Turnkey Solutions

FROM DIRECTOR'S DESK

Dear friends,

We are meeting after long time – almost after 7-8 months. 2023 has been a very exciting year – the world witnessed two wars, upsets in many parts, growing unemployment, growing stock markets and many more. Amidst all this, the year has been a very good year for Indian economy. Construction as well as Manufacturing sectors experienced good growth in terms of volumes as well as financials. Indian market is ever growing and we all are ready for growth and scale in the years to come.

The next step for all of us is to change our mindsets and adopt latest technologies and systems in our day to day working. With the numerous fast growing technologies and use of AI in almost all areas, the business scenario is going to change and adopting old methods are no longer useful. All of us must switch to technologies and strategies that can match the business demands.

At Archivista, I am grateful to have a self-motivated and dedicated team to work with. Let's continue to work hard and have a successful new year.

Happy 2024 to all of you!!!

Mr. Sanjay Rode
Director

NEWS SNIPPETS . . . !
